A Journal of Fisheries and Marine Research
Volume 8

Special issue on **The Future of
the North Sea**

*Eight lectures presented on
the occasion of the Centennial
of the Danish Institute for Fisheries
and Marine Research*

– in cooperation with the Danish Academy of Technical Sciences

*The Danish Institute for Fisheries and Marine Research
Charlottenlund, 1989*

Preface

This volume of 'Dana' contains the manuscripts of eight lectures held on the occasion of the 100 years anniversary of the Danish Institute for Fisheries and Marine Research (DIFMAR).

The lectures were given at two meetings on the Future of the North Sea, organized by the Danish Academy of Technical Sciences in cooperation with DIFMAR.

The first meeting, which was held on 24 August 1989 was on the fish and fisheries of the North Sea. The second meeting, which was held on the 28 September 1989 was about the environmental aspects.

The papers published in this volume are reproductions of the manuscripts from the lecturers with only minor editing.

Thus, the aim has been to present some visions on the future prospects of the North Sea as envisaged by the scientists who were invited to speak at the meetings.

DIFMAR gratefully acknowledges the support provided by the Academy.
